

Market Umbrella (MU01, MU02, MU03)- Wire Replacement Instructions

1. Lay umbrella on a flat surface.
2. Remove broken orange wire.
3. Insert new orange wire through corresponding rib holes
4. While one person holds the ribs in place in indentations on each hub, push the orange wire into the horizontal groove on the hub.
5. While still holding ribs in place, tighten the orange wire and the ends by twisting the wires together. Tighten as much as possible.
6. Excess wire can be clipped and discarded.
