WORLD'S FINEST ROCKER ASSEMBLY INSTRUCTIONS

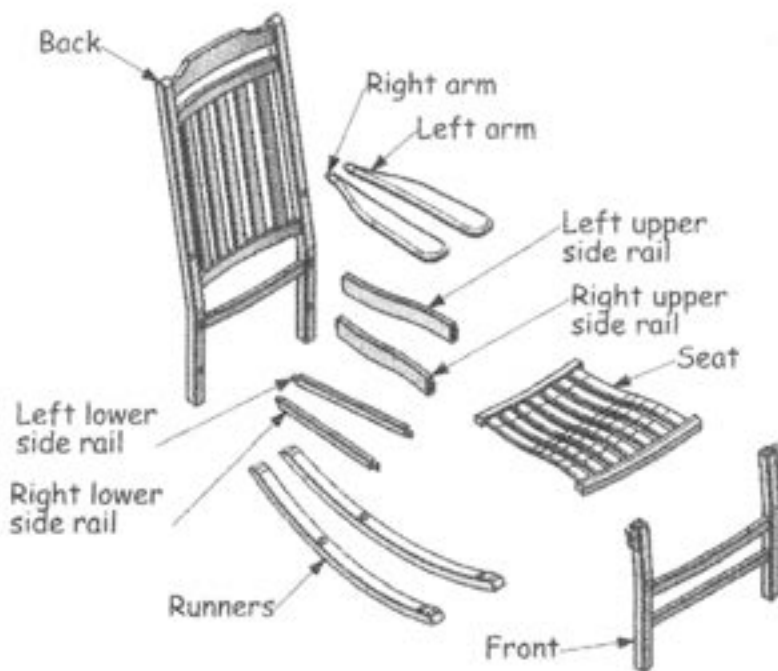

You're going to love your new rocking chair! It has been shipped partially assembled to reduce the likelihood of shipping damage and dramatically lower the cost of shipping to your door. Don't worry: assembly is straightforward and this amazing rocker will provide years of durability and enjoyment.

This product is covered by a FIVE Year Limited Warranty on the frame against manufacturer's defects for residential: three years for commercial applications.

One Year Limited Warranty on the paint finish against manufacturer's defects for residential and commercial applications.

What is not covered: This warranty does not cover and is void if damage is a result of freight/shipping, a failure caused by unreasonable or abusive use, acts of God, improper care and maintenance, mildew, normal wear, and/or the product has been modified or repaired after purchase. Paint on natural wood that is not a high gloss finish, may have minor inconsistencies throughout the product, this is normal and is not considered a warranty item.

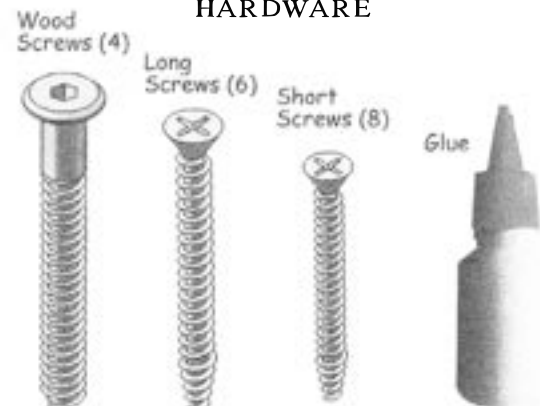

PARTS

TOOLS NEEDED

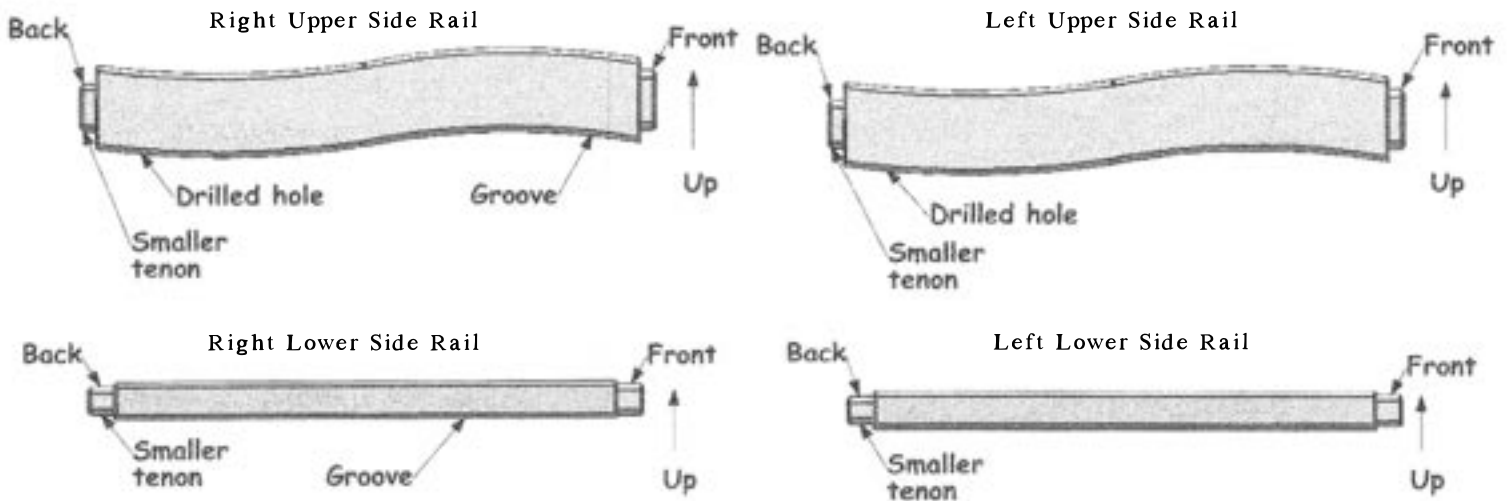

HARDWARE

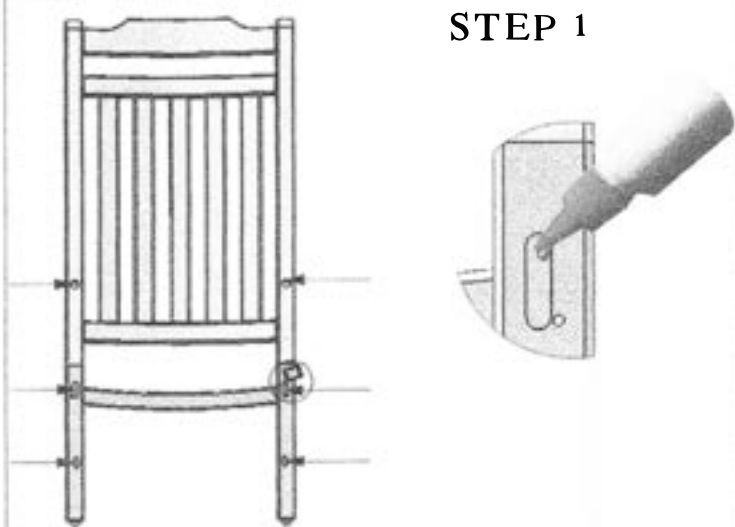

IMPORTANT: Do not fully tighten screws until the runners are installed in Step 8. This will provide wiggle room for the frame to properly align to accomodate the runners.

NOTE: FIRST IDENTIFY THE LEFT & RIGHT SIDE RAILS. THE RIGHT SIDE RAILS CAN BE IDENTIFIED BY THE GROOVE ON THE BOTTOMS OF THE RAILS.

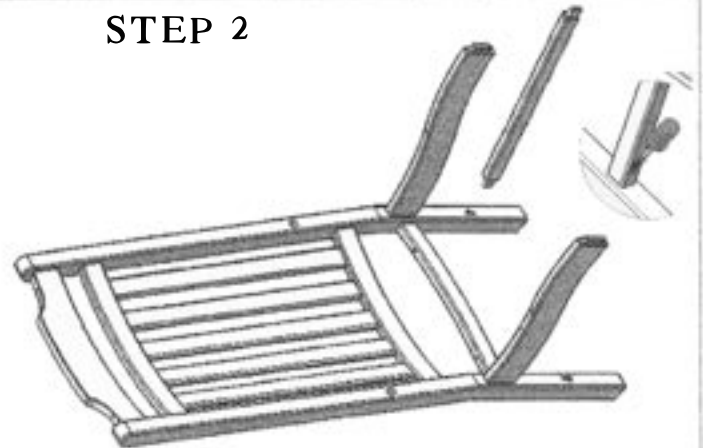

STEP 1

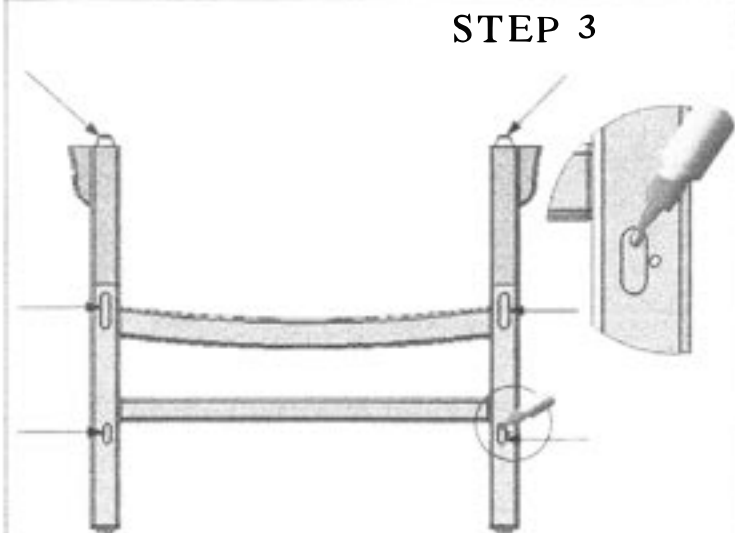

Lay cardboard down on a table and place the long back piece of the rocker backside-down on the table. Apply glue to the holes on the posts as indicated above, spreading evenly.

STEP 2

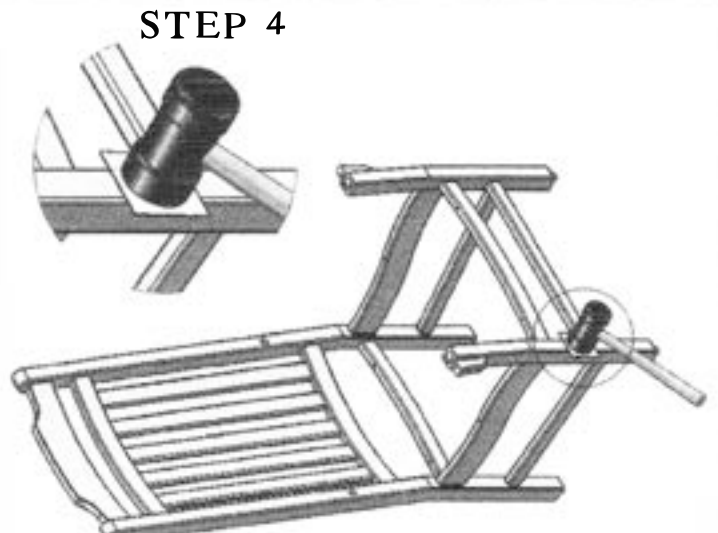

Apply glue to the tenons of the upper and lower side rails and install them in the back posts using the SHORT SCREWS. Note: don't fully tighten the screws until completion of Step 4. Be sure you have the left and right rails properly identified (the right side rails have the groove on the bottom) and check that the drilled holes face the bottom of the rocking chair.

STEP 3

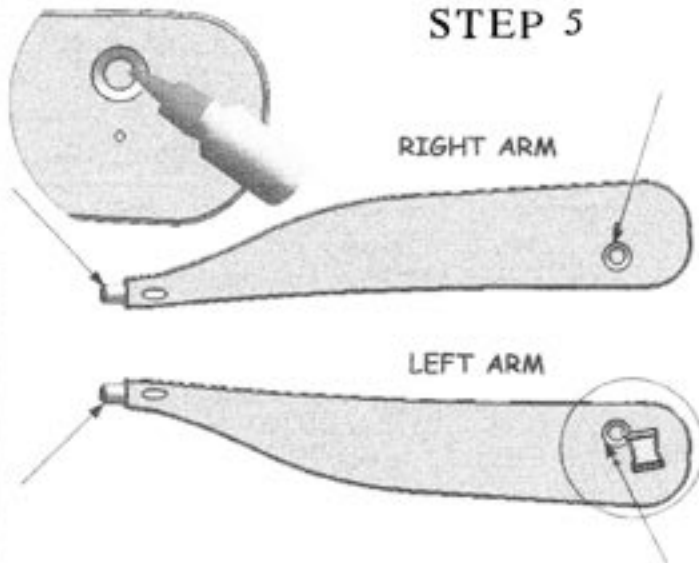

Apply glue to the holes and tenon on the front piece of the rocker, spreading evenly.

STEP 4

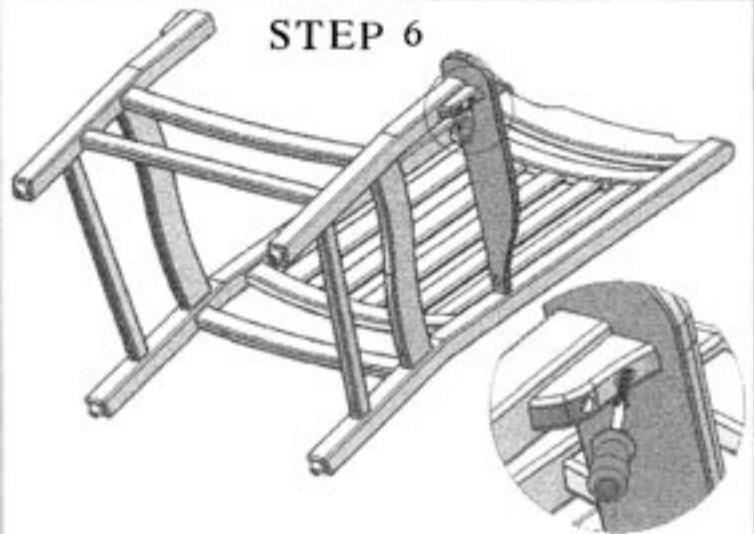

Install the front piece using the SHORT SCREWS. If necessary, use a rubber mallet (protected by foam packaging) to seat the rails.

STEP 5

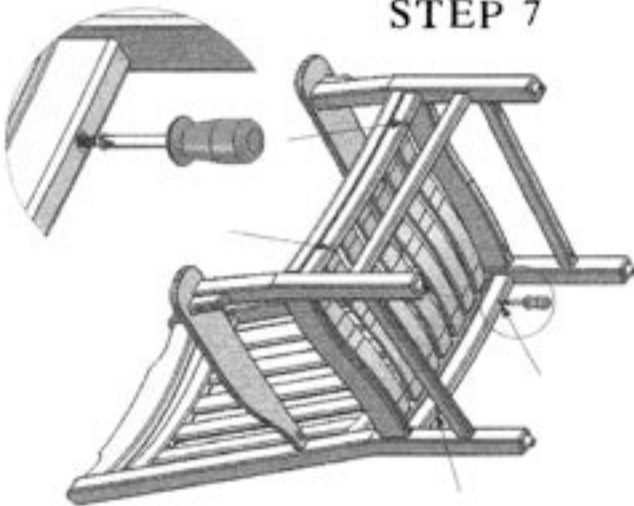

Apply glue into the holes and on the tenon of the arms.

STEP 6

Install the arms onto the chair using the **SHORT SCREWS** at the front of the armrests and the **LONG SCREWS** at the back of the armrests (into the chair back).

STEP 7

Install the seat. The remaining **LONG SCREWS** go through the chair frame into the bottom of the seat. Note that the front cap of the seat overlaps the front of the chair.

STEP 8

Apply glue to the rocker frame tenon and the runner holes. Position the chair frame at the end of the table (to allow runners to hang over the end) and install runners by inserting the top first and then swinging down to hook onto the bottom tenon. Use the Allen wrench to tighten the runner bolts.
